

SAFETY HINTS AT ATM'S

- If possible, use ATM's you are familiar with or choose well-lit, well situated ATM's.
- Scan the area before you approach the ATM and avoid using an ATM if there are suspicious-looking people around, or if it is isolated or looks unsafe in any way.
- Avoid opening your purse, bag or wallet while in the ATM queue. Have your card in your hand or pocket before you approach the ATM.
- If the ATM appears to have attachments to the card slot keypad, use another ATM and inform the bank.
- Avoid ATM's with messages or signs fixed to them indicating that the screen direction have been changed - especially if the message is posted over the card reader.
- Do not accept help from strangers and never give your PIN to anyone (even people claiming to be bank employees or security guards.
- Do not forget to take your receipt or transaction records with you to protect information of your account.
- Be on the lookout for "shoulder surfing" - people standing close behind you to watch you enter your pin.
- Stand close to the ATM and shield the keypad with one hand when entering your PIN. Try using the knuckle of your middle finger to key in the PIN.
